

ACC GR 612 G-502

WHY ACC

- ✓ ACC offers products from the **top-class** activated carbon manufacturers.
- ✓ ACC ensures a **one-stop service** for varies demands from customers.
- ✓ **Double quality guarantee** from both manufacturer side and ACC side after production and before delivery.
- ✓ Approved by many authorized institutions from different fields such as **NSF, BV, HALA, Kosher**.etc.

It is coconut-shell-based granular activated carbon designed and optimized for gold recovery applications.

It can help to achieve high gold loadings and the relative ease with which they can be stripped enables gold processors to obtain the highest possible yields from ores with high silver/gold ratios, carbonaceous ores, and ores containing other metals that complex with cyanide, for example, copper and nickel.

This product enables gold processors to maximize profitability because of the activated carbon's ability to deliver the highest possible yields at a lower carbon price than traditionally available

Package: Packed in 500kg jumbo bag. Other packaging is available upon your request.

Standards: All the above test methods are performed using ASTM protocol for activated carbon.

SPECIFICATIONS

GR 612 G-502

CTC	50 min
Ash by weight	5% max
Moisture by weight	5% max
Hardness Number	98% min
Platelets by weight	3% max
Particle Size	6x12
