ACC GP/SR 410G-60

WHY ACC

- ✓ ACC offers products from the **top-class** activated carbon manufacturers.
- ✓ ACC ensures a **one stop service** for various demands from customers.
- ✓ **Double quality guarantee** from both manufacturer side and ACC side after production and before delivery.
Approved by many authorized institutions from different fields such as **NSF, BV, HALA, Kosher**.etc.

GP 410G-60 is a high activity virgin activated carbon designed for gas phase applications. It is a bituminous coal based product activated by high temperature in a steam atmosphere under controlled conditions.

The particle size and internal pore size distribution allow for rapid adsorption kinetics at a medium to low differential pressure drop across the carbon bed.

It can be typically used in solvent recovery, catalyst support, gas purification, odor control etc.

It can be reactivated for reuse, eliminating disposal problems, because of its surface area, density, and strength characteristics.

Package: Packed in 500kg jumbo bag. Other packaging is available upon your request.

Standards: All the above test methods are performed using ASTM protocol for activated carbon.

SPECIFICATIONS	
GP 410G-6	
Carbon Tetra chloride	60% min
Moisture (as packaged)	2% max
Hardness Number	90% min
Particle size	4-10
4 US Mesh (4.75mm)	5% max
< 10 US mesh (2.00mm)	5% max
