## ACC GP 325 G-350

### WHY ACC

- ✓ ACC offers products from the **top-class** activated carbon manufacturers.
- ✓ ACC ensures a **one-stop service** for various demands from customers.
- ✓ **Double quality guarantee** from both manufacturer side and ACC side after production and before delivery.  
Approved by many authorized institutions from different fields such as **NSF, BV, HALA, Kosher**.etc.

This product is a brominated powdered activated carbon which is specially formulated to enhance mercury capture in flue gas treatment applications, such as flue gas streams with elevated levels of SO<sub>3</sub>.

It is well-established in the power generation industry that even a few parts per million (ppm) of SO<sub>3</sub> will have a dramatic impact on the performance of standard activated carbons. Sulfur-tolerant carbon will not only ensure superior performance, but will also mitigate the risk of noncompliance due to unexpected swings in fuel quality, sulfur content, and mercury re-emission excursions.

**Package:** Packed in 500kg jumbo bag. Other packaging is available upon your request.

**Standards:** All the above test methods are performed using ASTM protocol for activated carbon.

### SPECIFICATIONS

#### GP 325 G-350

#### Specifications

Moisture (as packed by weight)	12% max
-----------------------------------	---------

Sieve Size by volume (laser analysis)	
---------------------------------------	--

<100 US Mesh	100% min
--------------	----------

< 325 US Mesh	95% min
---------------	---------

#### Typical Properties

Iodine number	400-600 mg/g
---------------	--------------

Apparent Density (tamped)	0.4-0.8 g/cc
---------------------------	--------------

Ignition Temperature	> 350°C
----------------------	---------
