

ACC GP 325 G-D

WHY ACC

- ✓ ACC offers products from the **top-class** activated carbon manufacturers.
 - ✓ ACC ensures a **one-stop service** for varied demands from customers.
 - ✓ **Double quality guarantee** from both manufacturer side and ACC side after production and before delivery.
- Approved by many authorized institutions from different fields such as **NSF, BV, HALA, Kosher**.etc.

This product is a standard powdered activated carbon product. The inherited surface area and pore volume of the base material make it very effective in removing many flue gas contaminants.

By injecting this product directly into the flue gas stream, many contaminants such as mercury, dioxins, and furans can be captured.

Removal of this series is easily accomplished using existing particulate matter devices and can be landfilled with ash as non-hazardous material.

It can be typically used in mercury and dioxin control applications include: municipal waste combustors, hazardous waste combustors, hospital waste incinerators, etc.

Package: Packed in 500kg jumbo bag. Other packaging is available upon your request.

Standards: All the above test methods are performed using ASTM protocol for activated carbon.

SPECIFICATIONS

GP 325 G-D

Iodine number	600 mg/g min
Moisture (as packed by weight)	12% max
Sieve Size US Mesh	
<100 US Mesh	99% min
< 325 US Mesh	95% min
