ACC GP 325 G-LMC

WHY ACC

- ✓ ACC offers products from the **top-class** activated carbon manufacturers.
- ✓ ACC ensures a **one-stop service** for various demands from customers.
- ✓ **Double quality guarantee** from both manufacturer side and ACC side after production and before delivery.
Approved by many authorized institutions from different fields such as **NSF, BV, HALA, Kosher**.etc.

This product is a brominated powdered activated carbon designed to enhance mercury capture in fuel gas treatment applications. It is injected directly into the flue gas stream and is easily removed by existing particulate control devices. It can be landfilled with the ash as a non-hazardous material.

This series is proved to be particularly effective for utilities burning Powder River Basin (PRB) coals. It can be used to promote the oxidation of mercury without the use of front end boiler additives. It provides mercury capture and performance benefits versus a standard nonbrominated product and allows for a single injection for mercury control compared to using other means for mercury oxidation.

It can also be well-performed in following applications: coal-fired power plants, cement kilns, industrial boilers, municipal waste combustors, hazardous waste combustors, hospital waste incinerators, etc.

Package: Packed in 500kg jumbo bag. Other packaging is available upon your request.

Standards: All the above test methods are performed using ASTM protocol for activated carbon.

SPECIFICATIONS

GP 325 G-LMC

Specifications

Moisture (as packed by weight)	8% max
Screen Size by weight, U.S Sieve Series	
<100 US Mesh	100% min
< 325 US Mesh	95% min

Typical Properties

Iodine number	400-600 mg/g
Apparent Density (taped)	0.4-0.8 g/cc
Ignition Temperature	> 350°C
