

ACC WS PQR-03

WHY ACC

- ✓ ACC offers products from the **top-class** activated carbon manufacturers.
- ✓ ACC ensures a **one-stop service** for varies demands from customers.
- ✓ **Double quality guarantee** from both manufacturer side and ACC side after production and before delivery.
- ✓ Approved by many authorized institutions from different fields such as **NSF, BV, HALA, Kosher**.etc.

This product is made by high quality wood through specific production technology. Featured by large surface area(1400-1800m²/g), large pores(2-10nm reaches 70%), low ash content, high activity, long life time.etc, it can well adjust the acidic and basic groups of the catalyst surface; it can also remove impurities such as metal ion, which is an excellent catalyst carrier. It helps to greatly improve the activity and life time of the catalyst agent.

It can well replace the alumina base catalyst and coal-based activated carbon catalyst carrier, which is especially well-performed in the treatment of high concentrated organic waste water.

Package: Packed in 500kg jumbo bag.
Other packaging is available upon your request.

Standards: All the above test methods are performed using ASTM protocol for activated carbon.

SPECIFICATIONS	
WS PQR-03 C	
Iodine Number	900mg/g min
Moisture Content	5% max
Particle Size (GB/T12496.2-1999)	4mm
Apparent Density	0.28-0.38 g/ml
PH	2-5
Surface Area	≥1300-1800 m ² /g
Pore Diameter	80% ≥50nm
