

ACC GP 1050 for Air Purification

WHY ACC

- ✓ ACC offers products from the **top-class** activated carbon manufacturers.
 - ✓ ACC ensures a **one-stop service** for various demands from customers.
 - ✓ **Double quality guarantee** from both manufacturer side and ACC side after production and before delivery.
- Approved by many authorized institutions from different fields such as **NSF, BV, HALA, Kosher**.etc.

It is for air purification, made of original coconut shell, is activated in SLEP activation furnace with optimum technological conditions and the most advanced testing method. The product has the features of highly developed pore structure, large specific surface area, excellent adsorption capacity, absorption speed, low impurity content, and good chemical stability etc.

It is widely used in various types of high purity gas adsorption and separation, such as adsorption of carbon dioxide.

SPECIFICATIONS

GP 1050 E

Iodine Number (mg/g)	1050 min
Methylene blue (mg/ml)	9 min
Hardness (%)	98 min
Moisture (%)	10 max
Ash (%)	5 max
Particle size (mesh)	90% min pass through 4-8 mesh
PH	7
CTC (%)	55 min
Bulk density (g/ml)	0.40—0.55
Specific surface area (m ² /g)	1200 min

Package: Packed in 25kg bags. Other packaging is available upon your request.

Standards: All the above test methods are performed using ASTM protocol for activated carbon.
