

ACC WS F Series for Water Treatment

WHY ACC

- ✓ ACC offers products from the **top-class** activated carbon manufacturers.
 - ✓ ACC ensures a **one-stop service** for various demands from customers.
 - ✓ **Double quality guarantee** from both manufacturer side and ACC side after production and before delivery.
- Approved by many authorized institutions from different fields such as **NSF, BV, HALA, Kosher**.etc.

This series products is made by high quality sawdust, through special pyrophosphate production process. Featured by large specific surface area, developed mesopore structure, strong adsorption capacity, high purity of decoloration, fast filtration, and stable specifications performance, etc.

They are widely used in the purification of potable water, alcohol, and all kinds of beverage water, also all kind of production and living waste water purification treatment, etc.

SPECIFICATIONS

WS F

Types	Potable water treatment			Sewage treatment	
	YL-200- I	YL-200- II	YL-200-III	YL-200-IV	YL-200- V
methylene blue adsorption ml/0.1g	17min	13 min	8 min	18 min	14 min
Iodine number mg/g	1100	950	850	1200	900
Moisture %	10 max	10 max	10 max	10 max	10 max
Ash %	7 max	5 max	15 max	7 max	8 max
PH	4-7	6-10	6-10	4-7	4-7
phenol %	--	20	30	--	--
Fe %	0.05 max	0.15 max	--	0.5 max	0.1 max
200 mesh pass through %	--	--	--	95	--

Package: Packed in big jumbo bags or 25kg bags. Other packaging is available upon your request.

Standards: All the above test methods are performed using ASTM protocol for activated carbon.
